

PRO series treadmill

PRO5

The LifeSpan PRO series Treadmills are built for **Performance and Durability**.

We start with a heavy gauge robotically welded steel frame that is worthy of our lifetime warranty. Then we add top of the line components including a 3 HP Continuous Duty AC Motor, 3" machine ground tapered rollers, 1.2" reversible deck and 3 millimeters thick running belt. To keep our custom designed controller board running cool, we include an on-board cooling fan and ventilated hood. The result is a treadmill that delivers a smooth and consistent workout for every user that will last for years to come.

To make the series **Easy To Use** we include a 16 character alpha numeric display and Intelli-Key™ blue light buttons that quickly and easily step each user through the program set-up process. Then we include 3 additional LED display windows so that all readouts including Speed, Incline, Time, Distance, Calories and Heart Rate can be viewed at the same time.

For **Motivation** the PRO series treadmills come with 5 Preset Speed Programs, 5 Preset Incline Programs, 2 User Setup Programs, Target Heart Rate program and a Tri-Color program matrix.
